

## TAILAWRED TECH FOR PROS. transforming the legal industry.

Agens Oy is a Legal Tech service company and law firm that digitalizes the legal services industry at a time. Our technologies enable new ways of working, business models and information management solutions for legal professionals.

### AGENS LEGAL TECH SERVICES FOR LARGE CORPORATIONS AND LAWYERS

AGENS is a legal expert partner that digitalizes legal work processes and creates digital legal tools. Our clients include all size of companies but also attorneys and law firms, as well as other legal experts.

**Services. Also check out Agens Oy on YouTube:**

[Agens Oy Youtubessa](#)

We offer solutions to digitalisation of lawyer work and new business models in the legal services sector, for example, in the following ways:

Our electronic contract and document selection is based on own content and, where applicable, Agens Oy's more than 124 finnish and nearly 100 english legal tech tool during the year 2020, which will credit your customers with customized contracts and documents with quality and speed.

Agens platform works well in complex and demanding document creation because the tool is technologically incomparable and industrial torque allows for up to 1000 pages of data masses

The tool supports an unlimited number of different language versions as needed and is scalable internationally. You can also sell or distribute content to your customers as "White Label" solutions.

Agens will also build digitisation of entire legal processes, including through a purely customer-driven structure, guaranteeing the client IPR rights, such as its own robotic legalization tools to digitise and streamline various legalities Processes.

**USING AGENS DIGITAL TOOLS**

Agens tools and platform are used in the browser using their own usernames. Using the service is easy thanks to the intuitive interface, the documentation and logic in the document tools, and the straightforward user path.

The Agens document creation tool is integrated with Sign Space for digital signature and document management as an exchange for the document's further work. It is easy to use either way. In the cloud, new agreements and tools are automatically added to the system by Agens lawyers, as well as updating the corrections resulting from any changes to the legislation and developing existing tools to support feedback Basis. The creation process can be accessed by watching or clicking on the selected product on the Agens website.

Agens Legal Tech Editor and Flow is the most easy-to-use platform tool for the market to build digital contracts, documents and tools and manage versions and tools content across your organization. As a base, you will receive all prepared Agens Oy's document products, where english legal documents tools assortment will be over 100 in 2020. Finnish tools assortment is over 120.

The tool can easily build your own smart documents. We also build smart document tools on behalf of our customers, including legal design service design, user interface and instructions, and, of course, intelligently the text content built into the user's choice. Intellectual property rights remain with the customer.
